Emergency portable solar power generation system

Amorphous Silicon Solar Sheet

- Can be charged to a mobile battery using the included micro USB cable.
- Reliable, domestically produced solar power sheet.
- Ultra-lightweight. Solar sheet weighing only 120g.
- Amorphous solar sheet that is resistant to impact and bending.
- With eyelets, it can be hung anywhere facing the sun.

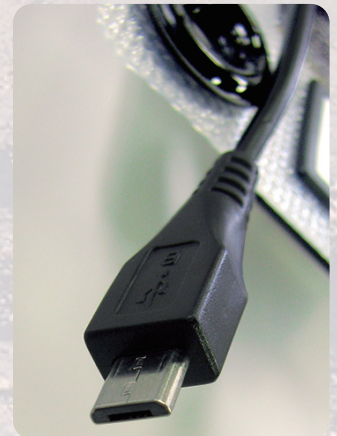

compact solar Let's use it effectively.

Multifunctional smartphones consume battery power quickly.
When the battery is low, you can top it up with a fully charged mobile battery,
and then charge the battery using a solar panel while using the smartphone.
By repeating this process, you can continue using your smartphone even in places without a power source.

Mini USB terminal

Solar sheet GA-0404A01 specifications

Product name	Compact solar sheet
Model	GA-0404A01
Main material	Amorphous silicon, ETFE
Nominal output *1	Maximum 4.2W/DC5V (Micro USB)
Dimension (mm)	L454×W228×t1 (Protrusions excluded)
Weight (kg)	Approx. 0.12
Storage temperature *2	−20°C ~ +60°C
Operating humidity *2	85%RH or less (Unless condensation)
Waterproof property *3	IP65 (solar sheet only, excluding junction box and connector section) *4

*1 Power generation efficiency varies depending on sunlight conditions, therefore the above values are not guaranteed.

*2 The unit may deteriorate significantly and malfunction if used in environments exceeding the specified usage and storage conditions.

*3 Do not use the unit when wet. Always wipe off any moisture with a cloth or allow the unit to dry completely before use.

*4 The IP rating indicates the level of protection against the ingress of foreign solid objects and water. IP65 prevents dust from entering the unit and is unaffected by direct water jets from any direction.
